TUONO 457 FEATURES

Dashboard

The Aprilia Tuono 457 features an ultra-modern 5” colour TFT display which provides a clear and intuitive interface. The handlebar commands are backlit for easy reading even in dim lighting conditions and deliver easy access to the various functions. Ride by Wire includes three Riding Modes (Eco, Sport and Rain) which adapt engine output and traction control to different conditions, meaning you always enjoy the very best riding experience possible.

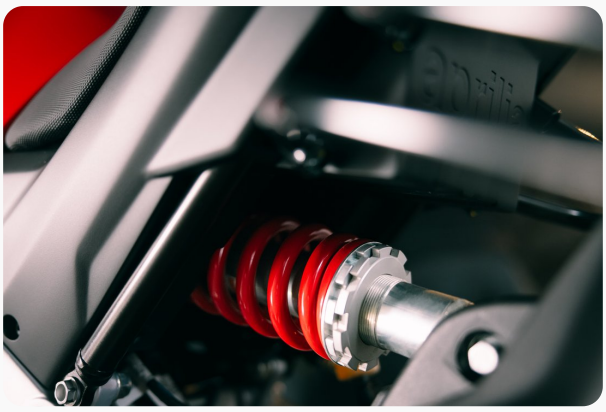

Full-LED lighting

The lighting units use full-LED technology for excellent visibility and an unmistakable illuminated profile. The completely new front unit is a compact and essential headlight cluster typical of a true Naked, innovatively reinterpreting the iconic triple-headlight design characteristic of all Aprilia models and including a small lower spoiler. The Aprilia Tuono 457, as a true nonconformist, is the only Tuono without a front headlight fairing attached to the frame.

Suspension

The 41-mm fork with 120 mm of travel is preload adjustable. The rear shock, which operates on the asymmetrical steel swingarm, is also preload adjustable and offers 130 mm of travel, ensuring optimal adaptability to various riding conditions, even with a passenger.

Brakes

Equipped with ByBre callipers acting on 320-mm steel discs at the front and 220-mm at the rear, the Aprilia Tuono 457 ensures an immediate and consistent brake response, courtesy of the front radial-mount calliper and the Bosch dual-channel ABS. The latter features a dual-mode setup, allowing the rider to choose whether to activate assistance on both wheels or just the front one.

Wheel rims

The Aprilia Tuono 457’s 17” wheel rims accommodate tyres measuring 110/70 up front and 150/60 at the rear for a combination that delivers unrivalled handling and showcases the renowned precision and solidity of an Aprilia chassis.
